# REACT-NATIVE

## P1. OVERVIEW

1

WHAT?

- Native mobile apps using JavaScript and React

- Don't waste time recompiling.

- Use native code when you need to
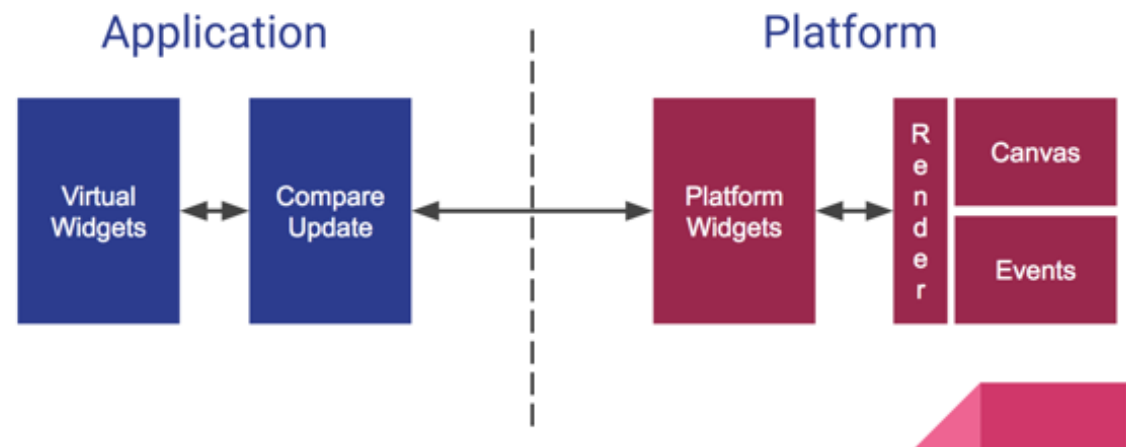

HOW?

HOW?

Webview

React-Native

Native view

PROS & CONS

Pros	Cons
JavaScript	Third-party components
Native control & module	Lagging SDK updates
ReactJS features	

COMPONENTS

- Reactive

- Base unit of RCT app

- Write with JSX

REACTIVE

JSX (JAVA SCRIPT XML)
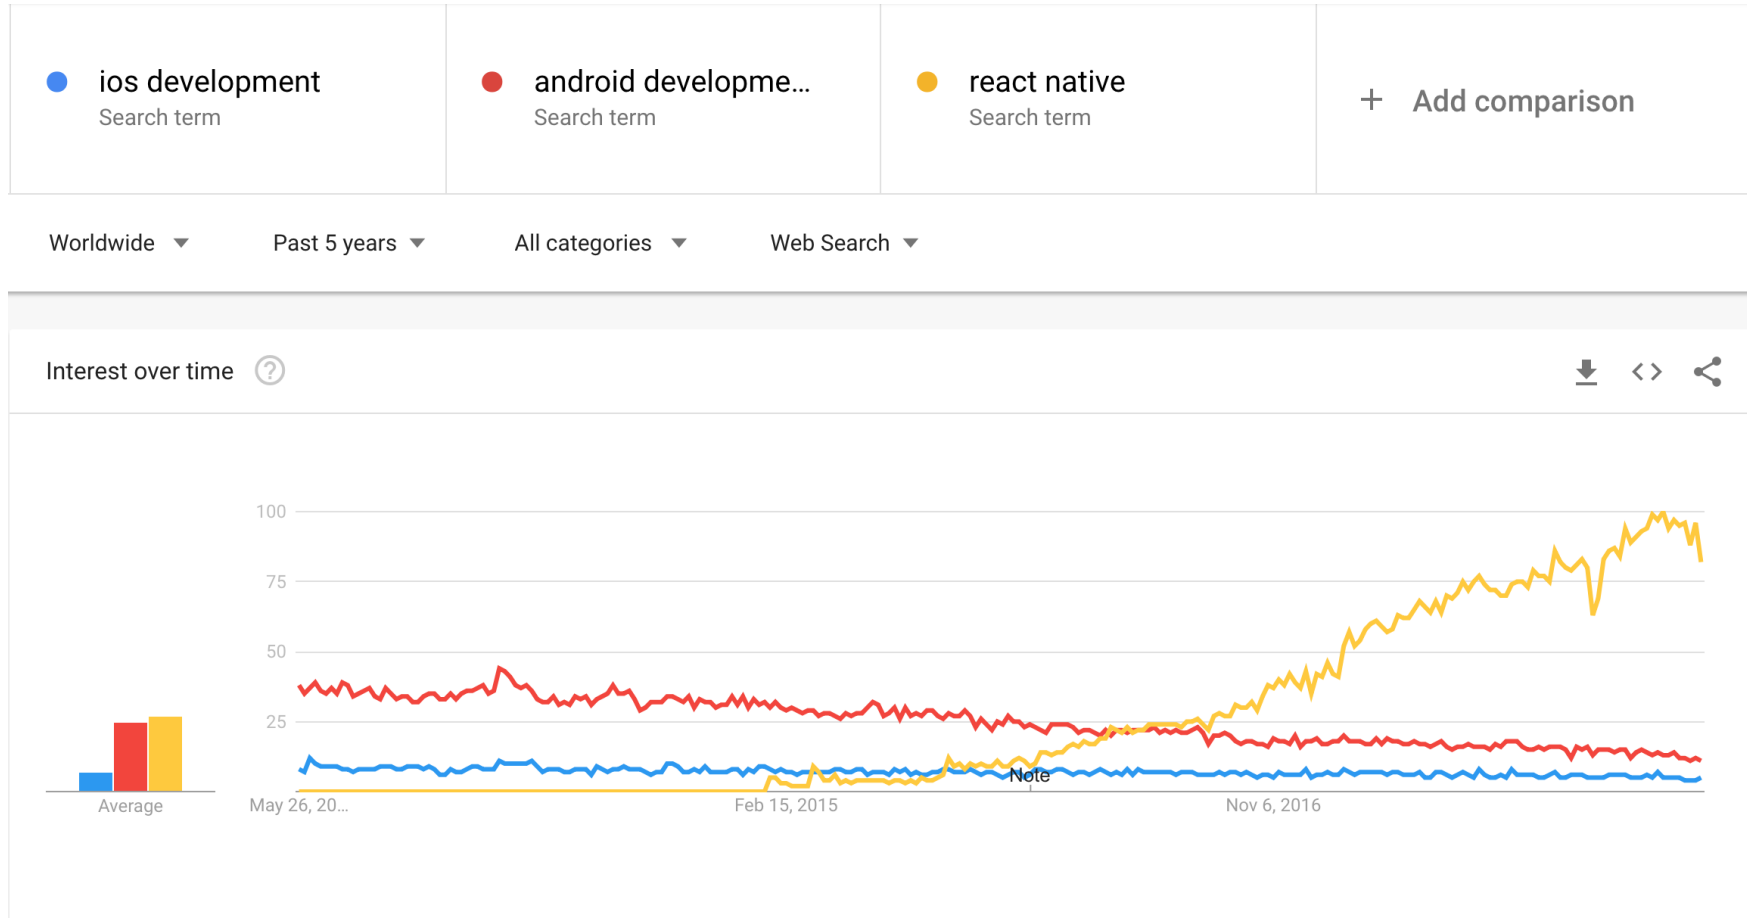

```
render() {
  const txt = 'Hello';

  function say(name) {
    return 'I am ' + name;
  }
  return (
    <View>
      <Text>This is a title!</Text>
      <Text>{txt}</Text>
      <View>
        <Text>{say('React')}</Text>
      </View>
    </View>
  );
}
}
```
